Making Enabling Assistance Available to People in Need

The Apex Foundation is the private, nonprofit foundation of Apex CoVantage, headquartered in Herndon, Virginia, USA, with technology campuses in India. The Foundation evaluates and awards grants annually that range up to \$50,000 (USD), with a focus on smaller organizations that are led by individuals with a deep personal commitment to their projects. At least 90% of grant monies is expected to directly reach the beneficiaries. Administrators of the Apex Foundation conduct site visits to grantee organizations to experience and evaluate their activities periodically.

The goal of the Apex Foundation is to support intervention programs that assist and inspire people to achieve self-sufficiency. The Foundation makes grants to non-government organizations (NGO's) providing social assistance to people challenged by poverty, disability, or discrimination. The Foundation also supports relief agencies that serve people affected by emergencies and natural disasters.

Qualifying grantee organizations are non-sectarian IRS 501(c)(3) entities involved in social services consistent with the Foundation's goals. Organizations not certified under IRS 501(c)(3) may also qualify for Apex Foundation grants by submitting an affidavit (form available on request). The qualifying process may include personal interviews and site visits.
